

FAST

Relational data is intuitively matched and reused with minimal user intervention. The heart of the program is the speedy game control which records actions as they happen. Coach Express has been built to work on a variety of laptop hardware types but it can show its true speed if used on a touch screen tablet!

FLEXIBLE

Set up your season according to your needs. Set your own play actions and point values in the Preferences. Add manual entries and/or edit action data already created at any time. Recall past game notes and edit notes on the fly at any time, even for past games.

SECURE

The administrator can control users, passwords and their level of access.

USER FRIENDLY

Initial setup process will have your season organised in minutes. Straightforward navigation and logical functioning.

SAVES TIME AND MONEY

No more manual paperwork after the game. Instantly view game statistics, even during a game. Recall statistics for any game and any player. Compare team performance by quarter or game. Coach Express automatically calculates shooting percentages for the home team, opponents and individual players. It can also automatically email players their individual game reviews and statistics according to any game they played.

DETAILED AND COMPREHENSIVE

Manage personnel data, including their notes, reminders, game reviews and performance. View statistics by game time as well as quarter and see exactly where play actions improved. Check vital action stats such as positive and negative centre passes, where they went and to whom. Discover emerging patterns from the detailed Action List. Implement effective and productive coaching strategies even when your team fails to win. Coach Express will provide a wealth of information for a progressive coach seeking to enhance team performance.

TRY IT FOR FREE NOW

Download Coach Express today from www.waddington.com.au. The download version is a full version and your data will be maintained even if the demo expires.

Coach Express is a fully featured, professional coaching / team management program but it is priced within reach of schools and suburban clubs. Please check our website for current prices. Special low price for schools and affiliated organisations registered by us¹.

WHY COACH EXPRESS NETBALL EDITION?

Coach Express is a comprehensive sporting team data management program that allows a netball coach to quickly manage personnel, season games, notes, reminders, player reviews, game action recording and extensive statistical information.

EASY TO SET UP

Anyone who has a basic knowledge of computer use, will have Coach Express running in minutes. Upon first opening Coach Express, an easy to use set up wizard will guide you through a series of core data requests. This data will then be automatically placed into key areas of the program. If you wish, you can even revisit the set up wizard at any later date.

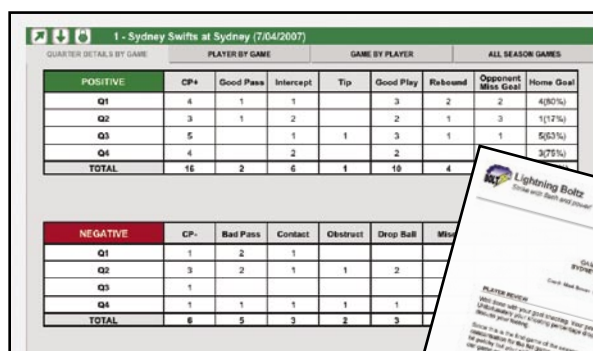

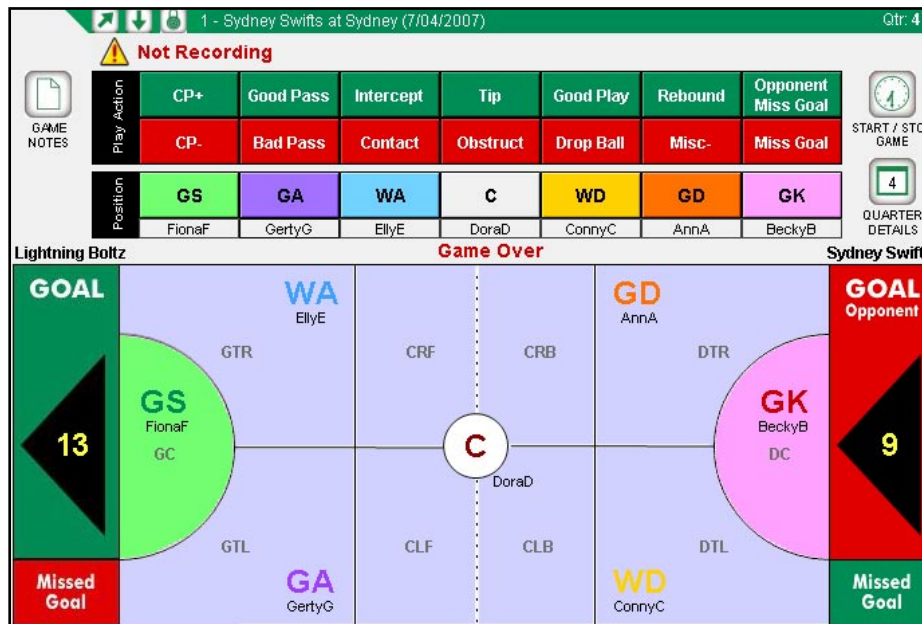

MAIN MENU

As you enter your games, they will greet you as a list on the Main Menu. There you can select any past, current or future game. Print out a season draw or even add pre-season or trial games.

PERSONNEL

A team functions best when a coach knows the people. Coach Express accounts for all people, not just players, in a dynamic database format that saves a coach's precious time by intuitively reusing information. Notes can be created for any person and used as reminders or game reviews. Game review notes are automatically linked to specific games and can be recalled for any person at any time. Notes can be printed or automatically emailed.

STATISTICS

A wealth of automatically calculated statistics – Quarter Details By Game, Player By Game, Game By Player, All Season Games, Player Reviews and All Player Statistics. Shooting percentages are also calculated automatically for home and opponent.

GAME CONTROL

Built in, is the unique Game Control – a fully featured, real-time game recording device. The Game Control can generate the statistics as they happen, thus allowing the coach instant access to vital statistics at any time during a game.

Pressing only two or three buttons creates an action record that automatically stores game time, play action, player name, player position and the actual court spot.

Button actions and positions can be altered according to your needs.

Players can be easily reassigned positions, even as the game is progressing.

After the game, the coach will have more time to focus on improving team performance because not only is the summarised statistical data

automated, but so is its dissemination. Player game reviews and statistics can be emailed to players on the fly or simply printed.

PRINT /EMAIL

Print or email automated reports such as Season Draw, Game Reviews, Player Reviews and all Player Statistics.
